DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wironen et al.

Wironen discloses a bone paste filed on 9-16-98 comprising:

- A Carrier that thermally sets just above human temperature;
- Demineralized bone matrix;
- BIOGLASS;
- Hydroxyapatite;
- Cortical bone chips;
- Bone morphogenetic protein;
- Bone marrow extracts;
- Minerals are to compose anywhere from 0%-60% by weight;
- The carrier comprising 11-30% of the weight; and
- Wherein the composition is implanted into a living mammal.

Wironen lacks the ratios by volume, the specific particles sizes; or the claimed bone morphogenetic protein.

It would have been obvious to one having ordinary skill in the art at the time of the invention was made to adjust the ratios of the carrier to other materials and particle size, since it has

been held that where the general conditions of the claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

It would have been obvious to one having ordinary skill in the art at the time of the invention was made to use the claimed bone morphogenetic protein, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

In respect to claims 18-26 and 29 are considered to be intended use of the composition. It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from the prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ 1964 (1987).

Response to Arguments

3. Applicant's arguments filed 7-26-04 have been fully considered but they are not persuasive. The applicant claims that a porous particulate mineral in an amount of at least 20% and wherein the mineral is selected from a group of BIOGLASS and Hydroxyapatite .

4. In paragraph 29 of the reference it is stated:

Where present (ii) or like material is included to enhance the range of manipulable characteristics of strength and osteoinduction exhibited by the composition, and may comprise between about 0-60%, including about 40%, of the mass on a weight basis of the composition.

And in Paragraph 26 it states:

ii) bioactive glass ceramic, BIOGLASS.RTM., bioactive ceramic, calcium phosphate ceramic, hydroxyapatite, hydroxyapatite carbonate, coralline hydroxyapatite, calcined bone, cortical bone chips, cancellous bone chips, tricalcium phosphate, like material, or mixtures thereof; or

Art Unit: 3732

This disclosure clearly teaches the varying of the ratio between 0-60%. This encompasses the "at least 20%" limitation in the claims. The rejection is deemed proper.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
